

# Population Density in 1970

## Population Density

Dark gray indicates a density of <1.5 people per acre: the US Census definition of rural.

Dark purple indicates a density of 1.5-7.5 people per acre and light purple a density of 7.5-15 people per acre. These are suburban densities at which cars tend to dominate.

Orange indicates a density of 15-30 people per acre and yellow a density of >30 people per acre. These are densities at which transit tends to be a significant form of transportation.

Data for 1970-2010 is from the IPUMS National Historical GIS, University of Minnesota, [www.nhgis.org](http://www.nhgis.org). Data from 2016 from the US Census American Communities Survey. Present-day county borders, transit, and roadways are shown on all years' maps.
